

Step one — recommended (not required)

Stallion service report/certificate

Owners or lessees of stallions must submit an annual record of mares the stallion(s) bred, and submit a report by January 31 the following year to prevent delays in registration. If a mare owner is not also the owner or lessee of the stallion, and a stallion service report is not on file, the mare owner must submit a stallion service certificate at the time of registration.

Step two

Photographs — required

Provide three (3) current photos of the horse: one of the left side and one of the right side standing with ears and hooves visible, and one of the front of the horse with front of face visible. You may also include extra photos for details of markings, brands, and scars, etc.

Registration application — required

The owner of the dam at time of foaling registers the foal into one of four sections in the studbook: Gold (section A) or Silver (section B) for purebred horses, or Pearl (section C) or Crystal (section D) for partbred horses. Gold purebreds are out of Gold parents and sired by licensed stallions. Silver purebreds do not have a stallion license requirement. Pearl partbreds are offspring of one purebred parent. Crystal partbreds are offspring of two partbred parents.

Registration fee — required

Fees vary, depending on age of the horse. You may pay online through our website or print a purchase order and pay by check.

Step three

Microchip and DNA — required

After your fees and application have been processed, CHBA will mail you a microchip and DNA form along with a microchip.

Your veterinarian must microchip your horse and sign the form. You must also collect a hair sample (about 40 hairs with root bulbs) to attach it to the form and send back to CHBA for DNA typing and parentage testing. The form is also available on our website if you need to rerun a hair sample or fix a mistake. **Please email chba@caspianthorse.com in advance if you intend to use your own microchip.**

After your horse is parentage verified and all the registration requirements are met, we will add the horse to our online studbook and mail the registration certificate and DNA results to the person you selected on your registration application.
